GREENTEC-USA, INC.  
Confidence in Data

## CONTINUOUS CYBER DEFENSE FOR DATA AND SYSTEMS

**CYBERdisk™ Technologies neutralize the risk of damage from cyber-attacks**, which is a major concern for every organization in today's data-centric world. The IT infrastructure we depend on is vulnerable to cyber-attacks that can render systems inoperable, corrupt data, delete data or hold your data hostage in the digital world.

**GreenTec Cyber Solutions** are the last line of defense when cyber-attacks occur, protecting data and systems from damage by providing survivable systems and survivable data solutions. They are compliant with the NIST 1800-11 Data Integrity guidance and are DISA tested and validated.

**CYBERdisks™ & WORMdisks™** protect data against manipulation, modification, deletion or re-formatting with security built right into the disk itself. The protection cannot be bypassed and travels with the disk, regardless of operating system used or access permissions.

**WORMdisks™** can store and protect data any time on demand, or on periodic intervals.

CYBERdisks™ & WORMdisks™  
provide the last line of defense  
against hackers that penetrate your  
network and security perimeters

Ensure the trustworthiness and integrity of your critical data. One simple step towards hardening systems and hardening data is to utilize hard disk technologies that protect systems and data at the hardware-level. With **CYBERdisk™** technology, data confidence is ensured by providing data protection within the disk drive hardware so it's easy to use and secure.

**CYBERdisks™** defend against various types of malware and viruses that would otherwise wipe out critical system boot information and inject itself into disk firmware. RansomWare cannot hold your data hostage, and insider / outsider threats cannot perform data manipulation, modification or deletion.

**GreenTec Cyber Solutions** easily integrate into existing computer systems, are simple to use, and provide confidence in your data. For more information, visit [www.GreenTec-USA.com](http://www.GreenTec-USA.com) or call (703) 880-8332.

### OVERVIEW

#### Unique Cyber Protection

Established 2005

Small Business

DUNS: 828322706

CAGE: 6KCT1

ORCA, CCR, SAM

#### Contract Vehicle Access:

- GSA Schedule 70
- NASA SEWP5
- CIO-CS
- VA T4
- Native American 8(a)
- Direct Sales

#### Product Applications:

- Cyber Defense
- eMail Repositories
- Audit logs & Records
- Video Surveillance
- Law Enforcement
- Archives & Data Backup
- Survivable Systems
- Data Integrity
- Defensible Evidence
- Permanent Records
- Medical Records
- Legal Documents
- Financial Data

#### Compliance Standards:

- SEC Rules 17a3-17a4
- DoD 5015.2
- Dodd-Frank
- HIPAA
- Sarbanes-Oxley (SOX)
- FINRA
- CAPSTONE
- NARA and OMB
- White House Directives
