

mycompanyarchive Is Taking Companies to a New Level of Archiving and Collaboration Using the Power of the Microsoft Azure Cloud

MICROSOFT AZURE APP BUILDER PROFILE: TECH-ARROW

TECH-ARROW is the founder and provider of mycompanyarchive.com, the cloud service designed for companies that would like to consolidate their in-house IT. We are primarily focused on Office 365 customers, helping them to build a common repository for all business data, giving the end-users federated access to their emails and files.

WHAT WE OFFER

In **mycompanyarchive**, you can manage your data in MS Exchange and Office 365 mailboxes in a secure way, relieve your mail server from large amounts of old data, retrieve emails easily in case of need, manage permissions to them and reduce the cost of their storage. We provide you with a lot of handy tools for accessing the archive.

Use **contentWEB**, this user-friendly WEB-based archive interface of mycompanyarchive, to easily access your company data, even from your mobile devices. Search and retrieve the archived emails and documents in a matter of seconds. Extend the functions of your online mailbox with our **Mail app**.

accessGATE Mobile is a native mobile application for mycompanyarchive. It can be also used as a stand-alone solution, providing mobile access to the crucial company data. Get the relevant information both quickly and easily and save your valuable time. Have the data available anytime, anywhere, even when offline.

With **officeGATE**, this cool MS Outlook add-in, you can handle your local and cloud files, attachments, and emails in your mailbox, without the need to have another application open. Need to have direct access to mycompanyarchive as well? Open, send, and copy the archived files with just a few clicks, directly in your mailbox.

WHAT OUR CUSTOMERS ARE SAYING

"Nothing beats the feeling of safety and productivity. We can do our jobs much more effectively and smoothly. Thanks a lot, Office 365 and mycompanyarchive.com!" – Orsolya Véghová, Managing Director, AVJO

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
